

Design and Technology (DT)

Design and technology is taught in a cross curricular way at Wootton Bassett Infants' school to deepen and enrich the main topic. A range of resources and experiences are provided to contribute towards stimulating and memorable learning. All teachers plan for DT activities linked to our scheme of work and curriculum map using a wide range of resources and materials. Work is very practical with lots of opportunities for modelling, making and sticking.

To develop children's understanding of the subject further, more opportunities are created for designing and evaluating. Items made from wood, paper, clay, construction materials and junk modelling are clear from a walk around the school and feature strongly in classroom displays.
