

## PE

At Wootton Bassett Infants we recognise that Physical Education (PE) is an important part of the National Curriculum and is essential in order for our children to keep fit and stay healthy. Our teaching promotes different areas of PE, including dance, gymnastics, team games and ball skills. The children have access to a variety of resources to help develop their skills. All the PE equipment has been labelled so it is clear what is available and has been stored across the school, to enable access to each year group.

The PE curriculum begins in the Foundation Stage under Physical Development where children focus on the fundamental movement skills such as hopping, skipping, rolling, jumping etc. This continues into Year 1 and Year 2 where children develop those fundamental movement skills. Children across the school also take part in team games and under normal circumstances, would attend team events such as orienteering within the Cluster Groups. This is something that we hope to resume next year.

Each class has had the opportunity this year to be taught by a specialist teacher from an outside agency, Premier Education. They offer individual lesson plans for each class, assessment for each child and access to their specialised knowledge of PE.
